New Jersey Successor Solar Initiative (SuSI) Program Overview
SuSI Program Timeline

- May 23, 2018 – NJ Clean Energy Act of 2018 directed New Jersey Board of Public Utilities (BPU) to close legacy SREC program and replace with new solar development incentives that minimize ratepayer costs
- May 2020 – Prior Transition Incentive (TI) Program began
- July 28, 2021 – BPU approved SuSI Program via two Board Orders
- August 28, 2021 – SuSI Program launched
  - TI Program portal closed coincidentally
Similar Features to NJ TREC Program

• 15-Year SREC-II Qualification Life
  • Begins with interconnection date
  • Projects eligible to sell NJ Class I RECs after 15 years

• Fixed pricing segmented by project type

• Energy year: June–May
  • NJ2022 = June 1, 2021 – May 31, 2022

• All projects must utilize a revenue grade meter
  • Expansions must be separately metered from legacy SREC and TREC program array(s)
Different Features from NJ TREC Program

• Designed with longer term in mind – will support the development of 3,750 MW of new solar generation by 2026
• No factors, now base price differences between market segments
• Pricing adders for public entities (+$20.00)
• Features two sub-programs*
  • Administratively Determined Incentive (ADI) Program (<= 5 MW)
  • Competitive Solar Incentive (CSI) Program (> 5 MW)
• Capacity blocks (see next slide)
• Additional SuSI Portal application requirements (see following slide)

*This presentation focuses on ADI Program features. CSI Program still in development with first solicitation targeted for early-to-mid 2022.
First come, first serve basis until market segment is fully subscribed or until June 1, 2022, whichever comes first

Once fully subscribed, registration portal will close for that market segment until following year’s blocks open. No waitlist prior to next block opening.

Capacity will be tracked and available publicly.

Future capacity blocks set annually by BPU.

New SuSI Portal Application Requirements

• For Net Metered $\geq 25$ kW: Electrical and Building Permits or Documentation…
  • Should demonstrate that electrical and building permit applications have been submitted to relevant municipality

• For Net Metered $\geq 25$ kW and $< 1$ MW: Part 1 Interconnection Agreement
  • Submitted to EDC and signed by customer and installer

• For Net Metered Non-Residential Serving Public Entities: Legitimacy Letter on Public Entity Stationery
  • “Public entity” includes a state entity, school district, county, county agency, county authority, municipality, and public college or university

Onboarding Process

1. Obtain SuSI Program certification* prior to applying to SRECTrade

*Will eventually require TBD registration fee payment which will take effect after at least one year from SuSI Program opening. Registration fee value to be determined by a BPU Order.
Onboarding Process

2. Submit online SRECTrade application (see next slide)

3. SRECTrade obtains PJM GATS certification

4. SRECTrade online account upgraded to fully approved, beginning production reporting and payments
Onboarding Process

SRECTrade Online Application

• Owner contact info, project specifications, PJM GATS Schedule A

• One notable change, page 5 will now allow the NJ SuSI Program certification number to be entered in their new, unique formats
  • Ex. NJ-XXXXXX-NMR-SREC-II
